## Product advantages

There is a sponge liner in the wheel. Press the wheel by hand, and the wheel will not deform. The outer wheel is made of rubber, with flat tread, large contact area with the ground and strong friction.

### Is there a liner?

**Yes**

The wheel is equipped with sponge rubber liner, and the friction and seismic effect are better than ordinary.

**No**

Ordinary wheel do not have inner liners. If you press them by hand, the tires will sink in.

### Flatness contrast

**Flat**

The tread is flat and has a large contact area with the ground.

**Convex**

The middle of the tread is convex and the contact area with the ground is small.

【Tyre groove】

【Motor column】

No coupling is required. The wheel is designed with a groove supporting the motor shaft, which can be directly inserted into the TT gear reduction motor for plug and play. It is suitable for our yellow carbon brush reduction motor.

## Two wheel patterns are available

Ordinary

Large friction

## Available in three colors

65mm Rubber wheel Yellow

65mm Rubber wheel Black

65mm High friction rubber wheel

## Product size

65mm Rubber wheel-Yellow

65mm Rubber wheel-Black

65mm High friction rubber wheel
